

Table of Contents: Volume 24 Issue 12 December 2022

Review

- 1169 Hypothesis: can transfer of primary neoplasm-derived extracellular vesicles and mitochondria contribute to the development of donor cell-derived hematologic neoplasms after allogeneic hematopoietic cell transplantation?**

M Imamura

- 1181 Subacute traumatic spinal cord injury: a systematic review and network meta-analysis of therapeutic strategies based on bone marrow mesenchymal stromal cells in animal models**

Z Shang, M Wang, B Zhang, X Wang, P Wanyan

Short Report

- 1190 Weight gain during treatment course of allogeneic hematopoietic stem cell transplantation in patients with hematological malignancies affects treatment outcome**

S Johansen, B Blomberg, AK Vo, Ø Wendelbo, H Reikvam

ISCT Committee Paper

- 1195 Particulates are everywhere, but are they harmful in cell and gene therapies?**

SA Molina, SJ Davies, D Sethi, S Oh, N Durand, M Scott, LC Davies, K Wormuth, D Clarke

Full-Length Articles

Basic Research

- 1201 Environmental oxygen affects *ex vivo* growth and proliferation of mesenchymal progenitors by modulating mitogen-activated protein kinase and mammalian target of rapamycin signaling**

M da Graça Cabreira, X Wang, A Critsinelis, M Setegne, P Lotfi, Y-W Wan, G Barrios, Z Mei, AP Gee, LM Buja, E Perin

- 1211 Proteomics profile of mesenchymal stromal cells and extracellular vesicles in normoxic and hypoxic conditions**

CL Braga, LR da Silva, RT Santos, LRP de Carvalho, SC Mandacaru, MR de Oliveira Trugilho, PRM Rocco, FF Cruz, PL Silva

Translational Research

- 1225 Incomplete chimerism following myeloablative and anti-thymocyte globulin-conditioned hematopoietic cell transplantation is a risk factor for relapse and chronic graft-versus-host disease**

RA Khanolkar, G Tripathi, P Dharmani-Khan, R Dabas, M Kinzel, A Kalra, R Puckrin, V Jimenez-Zepeda, K Jamani, PR Duggan, A Chaudhry, A Bryant, DA Stewart, FM Khan, J Storek

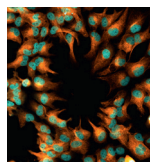

- 1232 γ c cytokine-aided crosstalk between dendritic cells and natural killer cells together with doxorubicin induces a healer response in experimental lymphoma by downregulating FOXP3 and programmed cell death protein 1**

R Singh, U Gupta, P Srivastava, A Paladhi, UH Sk, SK Hira, PP Manna

Manufacturing

- 1245 Towards sustainability and affordability of expensive cell and gene therapies? Applying a cost-based pricing model to estimate prices for Libmeldy and Zolgensma**

FW Thielen, RJSD Heine, S van den Berg, RMTten Ham, CAUyl-de Groot

Cover Image: Expression of the neuronal marker Beta III tubulin (Orange) in pediatric patient-derived stem-like cell line of glioblastoma (SF188) after 12 days of cultures in neuronal differentiation medium. Nucleus (DAPI, turquoise), obj*40 epifluorescent. Photo credit: Marc-Antoine Da-Veiga (Belgium).

Table of Contents (continued)

1259 Marrow changes and reduced proliferative capacity of mesenchymal stromal cells from patients with “no-option” critical limb ischemia; observations on feasibility of the autologous approach from a clinical trial

SA Mohamed, A Duffy, V McInerney, J Krawczyk, A Hayat, S Naughton, A Finnerty, M Holohan, A Liew, M Tubassam, SR Walsh, T O'Brien, L Howard
