Retraction to The impact of second-donor lymphocyte infusion on secondary graft failure after allogeneic hematopoietic stem cell transplantation through activation of Foxp3 and regulatory T cells

This article has been retracted: please see Elsevier Policy on Article Withdrawal (<https://www.elsevier.com/locate/withdrawalpolicy>).

The Editor of *Cytotherapy* has retracted this article.

The article duplicates significant parts of a paper that had already appeared in *Transplantation and Cellular Therapy*, Volume 28, Issue 3, 2022, Pages 152.e1-152.e7, <https://doi.org/10.1016/j.jct.2021.12.017>

In accordance with Committee on Publication Ethics (COPE) and Elsevier's policies, the authors have been contacted. After considering the author's response, the decision has been made to retract the paper.

Redundant publications overweigh the relative importance of published findings and distort the academic record of the authors. One of the conditions of submission of a paper for publication is therefore that authors declare explicitly that the paper has not been previously published and is not under consideration for publication elsewhere. As such this article represents a misuse of the scientific publishing system.

The scientific community takes a very strong view on this matter and apologies are offered to readers of the journal that this was not detected during the submission process.
